

CCTV equipment for the long haul

MAD maintenance-free quality ancillary CCTV equipment can be found in some of the world's most demanding and prestigious applications including Olympic stadia, seaports, motorways, traffic management and congestion charging schemes, prisons, tunnels, bridges... and of course, airports.

Ideal in all areas, our new weatherproof Panama is the first fully integrated dome with a 1/2" CCD colour camera and a 15x 8-120mm zoom lens for true optical quality. Our traditional IP68 pan & tilt heads and IP66 environmental housings come in three interchangeable sizes, with the largest combination capable of accommodating a 650x180x170mm camera/lens weighing up to 50kg. We even have an ultra-slow speed system to enable long distance tracking and people identification.

Design, manufacture and assembly is all under one roof for ultimate flexibility and unequalled reliability.
