

You don't have to be
MAD to work here

but it helps

MAD CCTV equipment is winning contracts left, right and city centre, and we're also copping more than our fair share of prison, police and highways & traffic management projects. The reason's simple: MAD equipment is incredibly reliable, virtually maintenance-free and comes at a competitive price. And because we design, manufacture and assemble under one roof we can provide unrivalled levels of flexibility and support. Just ask any MAD installer. If you're after a first class fit and forget solution with 'zero backlash' from your customers, do the sensible thing. Call a MADman today.
