

You don't have to be
MAD to work here

but it helps

MAD CCTV equipment is breaking into prison and other institutional applications in a big way, and we've a record as long as your arm for police, city centre and highways & traffic management successes.

Examine the evidence and you'll see why...

Really tough yet meanly priced, MAD equipment can take care of itself in almost any situation and because

we design, manufacture and assemble under one roof, no-one can catch us for flexibility and support.

If you're after a first class fit and forget solution from a company convicted to quality, do the sensible thing. Collar a MADman today.
