

welcome to the MAD house

where design

manufacture

and assembly

all happens under one roof...

a unique hat trick

MAD is unique in the ancilliary CCTV equipment industry with design, assembly *and* manufacturing under one roof. Inspect our standard product range, and the benefits are immediately obvious. Superlative build quality, unrivalled specification and innovative design promise many years, if not decades of maintenance free operation. However, where we *really* score is in our flexibility and rapid reflexes. 'Where specials come as standard' may be a cliché but at MAD, it couldn't be more appropriate. Because of our set up, custom designs can be realised faster and more effectively than ever.

To find out more about our MAD approach to quality CCTV ancilliary equipment, phone, fax or email today.

Design Hat

Our core range, based on 30 year's continuous development, has been redesigned from the ground up using the latest 3D CAD software.

Manufacturing Hat

All key components are manufactured in-house to the finest tolerances.

Assembly Hat

Products are put together by hand in a custom built facility.
